Skills

Python, Go, Javascript, Node.js, Java, Groovy, Docker, Linux, Git, MongoDB, Redis, Kubernetes, PostgreSQL, GCS, AWS, Grails, Elasticsearch, MySQL, Gradle

Work Experience

2019 - Current, Beerdappel Software - Owner

2016 - 2019, Healthy.io - Backend Tech Lead

Lead the company and team through major improvements such as:

- Stack shifts from "old fashioned" VMs to containers and Kubernetes, Python 2.7 to Node.js and Go
- A major rewrite of research and production systems
- Modernised CI/CD processes. Ensured HIPAA and GDPR compliance
- Growing the team from 2 to 6 engineers.

2015 - 2016, Codefresh - Senior Software Engineer

Development lead of the system's API, and the designer and owner of the system's next-generation build engine.
Mentored junior developers, researched new solutions and technologies, blogged and spoke publicly about our engineering efforts.

2008 - 2015, JFrog - Lead Developer

Hired as the first developer on Artifactory. Worked with the founders to build, design and maintain the core product. Involved in developing the eco-system, its integration with a plethora of tools used in the CI world and its cloud solution.

After 4 years working on Artifactory, joined the Bintray team as the lead developer. Took part in planning, technology selection and development of substantial and elemental sections of the platform.

2005 - 2008, IDF - Developer and Team Leader

Education

Enrolled in various Open University courses - Mathematics, Philosophy, CS, Physics and History.

Languages

Hebrew - Native, English - Native, Dutch - Een Beetje
